DETAILED ACTION

1. Claims 1-23 remain pending in the application. Claims 1, 9, 10, 18-20, 22, and 23 have been amended.
2. The objections to the specification and claims as well as the 35 U.S.C. 112, second paragraph rejections have been withdrawn by virtue of the Applicants' amendment filed 12/10/2007.

Response to Arguments

3. Applicant's arguments, filed 12/10/2007, with respect to claims 1-23 have been fully considered and are persuasive. The rejection of 09/17/2007 has been withdrawn.

Allowable Subject Matter

4. **Claims 1-23 are allowed.**

The following is an Examiner's Statement of Reasons for Allowance:

The present invention relates to general purpose performance counter ("GPPC") connected to a bus carrying debug data and the zeroing thereof.

The claimed invention as set forth in **claim 1** (broadest claim) recites features such as:

A zeroing circuit for a general purpose performance counter ("GPPC") connected to a bus carrying debug data, the zeroing circuit comprising:

logic for zeroing out a specified number of most significant bits ("MSBs") of a selected portion of the debug data based on a mask generated by a mask generator block, the logic for zeroing producing a result, and

means for providing a selection control signal to the mask generator block, the selection control signal operating to select the specified number of MSBs for zeroing.

The prior arts of record teach logic for generating a bit-wise mask; **Ranson et al.** (US-5887003) is one example of such prior arts.

The prior arts of record, however, fail to teach, singly or in combination, logic for zeroing out a specified number of most significant bits of a selected portion of the debug data based on a mask generated by a mask generator block.

As such, modification of the prior art of record to include the claimed *zeroing logic* can only be motivated by hindsight reasoning, or by changing the intended use and function of the prior art themselves. Therefore, it is not clear that one of ordinary skill in the art at the time of the invention would have made the necessary modifications to the prior art of record to encompass the *zeroing logic* set forth in the present application. Moreover, none of the prior arts of record, taken either alone or in combination, anticipate nor render obvious the *zeroing logic* as set forth in **claim 1**. Independent **claims 10 and 19** recite similar patentable features and are allowed for the same reason as **claim 1**. Hence, **claims 1-23** are allowable over the prior arts of record.

The Examiner agrees with the Applicant's arguments with regard to this feature in view of the arts of record; therefore, the Examiner favors the allowance of **Claims 1-23**. Any comments considered necessary by applicant must be submitted no later than

the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
